W 7/3 Mar

Re the necessity for some better quality of water obtainable for drinking - absolutely necessary. The other day I inspected in company of the Deputy Commissioner the two reservoirs, channels & the dams into which the drinking water is allowed to flow before it reaches the hands in the pettah - Anything more horrible it has never been my lot to witness - Drinking water passing through the sewage dams - a peculiar & unique method only known to the Municipality -

A well at the site indicated by the Deputy Commissioner may certainly be tried & should we be able to get good water & the kind provided for the citizens of Trichur will be an incalculable boon to them -

B Letter No. 269 Dt the 18th January 911 from the Dy Comr, Kadur Distt,

Submits a copy of the notes of sanitary inspection of the Kadur town by the Sanr Comr.

Submits with the Sanitary Commissioner's R. O. Opinion about the proposed work at Kadur. The work is estimated to cost Rs 3565/- and the Dy Comr requests that Rs 3500/- may be advanced from State Funds. The financial condition of the Kadur Municipality is as follows:-

Opening balance	849
Receipts for 1911-12	3003
Total	3852
Probable expenditure	3529
Closing balance	1123

Ordered by the Kadur Municipality 1573/94 as poor and for the reasons mentioned in the President's letter dated 16th Dec 1910, the proposal that the amount required for sinking the well be made available out of State funds seems deserving of favourable consideration. Forwarded to Sir W

18 How possible to make any grants from State Funds for this purpose. Neither Bd of Kaduna or the Local Bds General Grant to the Municipality

Hdeeg)

19 I dont think the Dt Board of Kaduna can reasonably be made to contribute to the Municipality — the Board has enough to do in this line within its own jurisdiction. The practice of L F fund not being made available for such purposes within Municipalities need not also be departed from the proper course is to ask the Municipality to require them to find the money themselves in the next years budget by reducing expenditure & raising taxes They may even be authorised to raise a loan in the market on condition that interest & Sinking fund contributions should be regularly provided for to extinguish the loan in 5 years

Offg Secretary to the Government of Mysore

General and Revenue Departments,

Bangalore

Sir,

With reference to para 3 of Government order No 6442-6 / Mul 352-08 27, dated 28th January 1910, calling for further report on the points referred to by the Sanitary Commissioner in his notes of Inspection of the Kadur Town, I have the honour to state that the only point calling for report in the Sanitary Commissioner's Inspection Notes of Kadur is that relating to the water supply of the town That the water supply of this place is most defective and unsatisfactory as an admitted fact, but the difficulty is to find a remedy A number of schemes have been considered from time to time as well be seen from the correspondence ending with my letter No.

No 244 dated 23/24 rd December 1909 and I have been obliged to come to the conclusion that the only feasible course at present is to excavate a few wells in different parts of the town though they might cost a large sum for deep excavation through hard rock

The Executive Engineer has been requested to favour me with plan and estimate for a well on the lines of the one recently constructed at Arsikere and on receipt of his reply, necessary action will be taken for sinking one or more as funds permit in convenient and suitable localities

I have the honor to be,

Sir,

Your most obedient servant,

S- Chairman

Enclosure No 3 { 1 Report, 1 plan, 1 Estimate }

Submitting an estimate for
Sanction for Rs 3712/ for sinking
a well in The Kadur Municipality

Office of the President of Municipalites,

Kadur District

Dated Chikmagalur, the 16th December 1910.

From

Mnl 195-10/823.

K.R.Srinivasa Iyengar Esquire, M.A.,

President of Municipalities, Kadur District.

To

C.S.Balasundaram Iyer Esquire, B.A.,

Offg. Secretary to the Government of His Highness

the Maharaja of Mysore, General and

Revenue Departments, Bangalore.

Sir,

Adverting to Government Order No 5998-9/Ml.232-05 dated 40/169 19th January 1910 recording this office report No.245 dated 23rd December 1909 stating that in accordance with the resolution of the Municipal Board of Kadur, steps will be taken to sink a well in Kadur town and in continuation of this -- office letter No 180 dated 8th November 1910 stating that the Executive Engineer has been requested to favour me with plan and estimate for a well on the lines recently constructed at Arasikere etc , I have the honor to submit herewith for -- sanction of Government an estimate for Rs.~~3715~~ 3525 for sinking a well 60' deep prepared and forwarded by the Executive -- Engineer, Kadur Division. The estimated closing balance in favour of the Kadur Municipality for the current year is only Rs 1123/- as per sanctioned Municipal Budget and this sum is therefore insufficient to meet the cost of the proposed well As the income of the Municipality is very poor and it is already burdened with a debt of Rs 3300/- for which it has to make an annual payment of about Rs.300/-, it is unable to -- meet the cost of the well by a loan In these circumstances, I beg that the Government may be pleased to sanction a grant

Ml 1 in Vol 7 195-10

of Rs.3000/- for the construction of the well.

2. A sum of Rs.7500/- has been sanctioned by Government for water supply to Mudigere town in their order No 6135-7/ Ml 321-07-4 dated 4th January 1910 and this amount has been provided for expenditure in the D P.W Budget for the current year I have, in my letter No.368 dated 11th April 1910 to Government, reported on the unsuitability of adopting any large and expensive project for Mudigere and suggested the deepening of the existing wells and the excavation of a few more deep wells at a cost of about seven or eight thousand rupees.

3. If this meets with the approval of Government, the provision of Rs 7500/- made in the budget for the Mudigere Municipality will be capable of reduction by Rs 3500/- and I would beg that this amount may be made available for Kadur in view of the fact that the town is in very bad need of a good water supply, especially in summer and the excavation of the proposed well, which would be on the lines of the one recently constructed at Arasikere, would go a great way to meet the water scarcity in the place

I have the honor to be,

Sir,

Your Most Obedient Servant,

President of Municipalities,

Kadur Distr[illegible]

K.R Srinivasiengar Esquire, M.A.,

Deputy Commissioner, Kadur District.

To

Ml 195-10-2

C S.Balasundaram Iyer, Esquire, B A.,

Offg Secretary to the Government of

His Highness the Maharaja of Mysore,

General and Revenue Departments

Sir,

With refererence to your docket No 4972/Ml 195-10-2 dated 9th December 1910 calling for the notes of Sanitary Inspection of the Kadur Town, I have the honor to state that the same was already submitted to you with my letter No 355 dated the 25th March 1909 A copy of the said notes is, however, herein enclosed for reference.

I have the honor to be,

Sir,

Your most obedient servant,

Deputy Commissioner,

Kadur District

Inspection notes on Kadur Town

13 2-1909

On the way to Kadur we saw many herds of cattle some of which were in a state of extreme emaciation The Deputy Commissioner made constant enquiries from the herdsmen as he proceeded It appears that they had tried the hill country and the grass did not agree with the cattle, so they were returning to their own place A young buffalo seemed to be dying on the road side The contrast between these cattle and those I saw on the hills was very great

Dropping cases of plague have been occurring in Kadur There was one convalescent case remaining, a woman She was living in a varandah room the house had otherwise been evacuated and was being tended by her son, and making good progress towards recovery under the attention of the Hospital Assistant

In these towns the absorbing difficulty - the water-supply The unsanitary methods of magalur are repeated here except that the ch

water is not let into the pipe distribution system but into a bonda in the heart of the town after flowing for some distance along an ordinary open street drain. A few cholera microbes added to this open channel and Kadur is decimated. But the difficulty in proposing an alternative to the present condition is not small. One runs up against the financial question at every turn. But this question of open channels liable to ready infection with results in the form of the death of hundreds of the people — people already fast disappearing if statistics are worth the paper they are written on — has to be faced. It is a national and not a parochial question. What is to be the solution of it in Kadur as in Chikmagalur? Public Funds will have to be freely spent. An attempt was once made here to carry the water from a distant bonda in iron pipes. These have apparently been allowed to get out of order, and the open channel provided instead. This is wrong. Every foot of piping means additional safety, and the pipe system ought to be reverted to as early as possible. But that will not solve the whole difficulty, for I am told that later on in the year the bonda

2/ itself and the channel feeding it will run dry But I am not sure if this is correct There was devided opinion Some old men said there was a good spring in the honda and that the honda would hold a lot of water if it was cleared of the silt which has accumulated in it for ages Why not clear it out ? A Sanitary Engineer is badly wanted in that neighbourhood ! Then protect the honda with a chevaux de frise and see what the result will be At present any one who likes pollutes this last resource of the people of Kadur When shall we have a triangle on the banks of every drinking water honda to flog the citizen who is such a worthless citizen as to poison the water supply of his neighbour ! But before resort is had to this, some means must be provided to enable the citizen to get at the water and take off his supply without polluting the remainder In my opinion, in the great majority of cases the water can be got at by means of pumps where hondas are the reservoirs It is years I began advocating pumps in such cases — 2 in connection with the magnificent honda chataldrug a structure of which any peop/e

well be proud and preserve it as a monument to the genius and foresight of their ancestors— But the builders of these monumental structures may well be ashamed of their degenerate — posterity, who instead of preserving them in beauty and purity convert them unblushingly into pestilential latrines It makes one's blood boil to see these things going on and not a finger extended to check them But in regard to Kadur, should the cleansing of the honda fail to reveal the spring about which I heard so much, and the water again fail, then a well will have to be dug in the valley below the town, where the areca plantations are and water pumped up to a reservoir in the town for a few months in the year This will mean money but it will also mean a diminished death rate and that increase in the population which mysore so badly needs It does not seem to be realised that what mysore wants is more people if she hopes to be really rich and prosperous, and the secret of this is to keep the existing population healthy and increase the average longevity as much as possible,

3/ and there is no agency so well calculated for these ends as an abundant supply of pure water, no object therefore more worthy of the expenditure of the public Funds
